

SPECIAL INVITATION

The Citizens Committee on Human Rights (CCHR) invites you and your staff to attend our International Traveling Exhibition in the Jubilee Room at Parliament House on Thursday 13th July from 10am-4pm.

The Purpose of this exhibition is to show people the reasons behind the failing mental health system & provide real workable solutions.

Below are just some of the horrifying facts that are the result of psychiatric labeling & drugging of our children:

- ❖ March 2006 documents obtained from the TGA by CCHR National Office, showed that there have been 400 adverse reactions reported for Ritalin & Dexamphetamine. A 7 year old on Ritalin attempted suicide, a 5 year old had a stroke while on the drug and another 7 year old suddenly died while on Ritalin.
- ❖ On June 5th the media reported that documents obtained by the Therapeutic Goods Administration (TGA) showed that there have been 827 adverse reactions reported for children under 10 who have taken antidepressants.
- ❖ Prescriptions for antidepressants have skyrocketed over recent years and there have been 220,000 prescriptions written for under 19's in Australia, with an estimated 15,000 of those being for children under 10.

CCHR Commissioners and staff will be on hand to answer your questions and provide more information so that you can make an educated, informative decision on what you can do.

Important Note: TGA documents will be available for viewing on the day.

RSVP: Kim Cullen 0404 844 882 or Mike Woods 0423 876 959

CCHR is an international, independent, non profit organization that was founded by the Church of Scientology and Dr Thomas Szasz, Professor of Psychiatry, in 1969 to investigate and expose psychiatric violations of human rights.
